Thinking Out Loud

G. W. L.

Now that the veterans have received their bonus in actual reality, a major political bone of dissension can be written off the books. No longer need the political heads of the various parties make promises about, and dodge the issue of the bonus. We hope that the veterans may employ their hard-won cash wisely, and usefully. There is no doubt that shady promoters and unscruplous schemers have looked on the bonus as an undisguised blessing to them and their kind. However, the efforts of the veterans organizations. and articles which have appeared in public print, have done much to spoil the plans of these men, and have given the veterans a chance to utilize their money in ways best for themselves.

On June 15 little Finland paid its war debt installment in full—as it has done every year. The so-called "great" nations, have sent over to us nothing but excuses, regrets, and lots of paper. Not only should Finland be set up as an example of a nation conscious of its obligations, but it should serve as guide to our own country, which is now running up a national, not a foreign debt, which is reaching such gigantic proportions, that it can almost never be paid off. Why should we, a country with much larger resources than Finland, be unable to balance our budget, and keep our finances in such condition that we too can pay off our obligations here at home?

Camp Pahatsi is scheduled to open on July 5. At that time hundreds of boys from this district will trek their way to the cool mountains, and begin learning invaluable lessons from old Mother Nature, as well as other important lessons which the Boy Scout principles inculcate in our youthful citizens-to-be.

Here in Nevada City, one of the strongest and most active civic organizations, the Whiskerinos, are preparing to give this town and the thousands of visitors who will flock here, a real, old-fashioned Fourth of July, with all the trimmings. The Whiskerinos and vari-colored shirts are only a symbol of the united efforts of these men to put across a community project, with vigor and success. Long live the Whiskerinos!

CAMPTONVILLE

By ACTON M. CLEVELAND .

CAMPTONVILLE, June 18.—W. D. Vanderhoff of Sacramento was in town on business Monday.

Forest Ranger Frank W. Meggers, assistant Ralph Gleason and Earle Pauly left Monday for Tahoe-Ukiah to attend the annual forest officers school.

William Wensel arrived Wednesday from Albany on a visit to his mining claims here.

Myron Pauly and Acton M. Cleveland motored to Nevada City Tuesday evening on business.

Chas. Gunter who has been at the True Grit mine left a few days ago for his home in Marin county.

J. E. Pauly motored to Sacramento Saturday on business.

Gene Hays who hurt his back working on the WPA project is on the improvement list.

Dr. and Mrs. C. C. Sutton of Downieville were in town on a short visit Sunday.

This section was represented by over a hundred persons Saturday and Sunday at the Cherry Carnival at North San Juan.

Miss Lesta H. Joubert left Tuesday for Sacramento on a short visit.

James L. Joubert, Miss Edna Merrill and John F. Lord arrived Tuesday from Berkeley.

Miss Susette Dornberger left on Tuesday for her home at San Jose following a short visit here.

CAMPTONVILLE SOCIETY

CAMPTONVILLE, June 18.—Mrs. Theo. Tabler gave a hobo party on Thursday evening at her home on Spring street for all those who took part in the recent high school show and party. The guests gathered in the attic, and were attired in rough clothes, during the evening they were sent about town to beg for good for their meal. Games were played and musical numbers enjoyed. At midnight a delightful meal of stew, bread, pickles, and cookies was enjoyed by the guests, sitting on the floor, eating out of tin plates and drinking the coffee from tin cans.

The following were in attendance: Misses Mary Hackley, Dorothy Hays, Katheryne Pauly, Guyla Tabler, Lolo B. Cleveland, Theo. Tabler, Spec Downs, Leland Buckley, Bill Jones, Lester Morris, George Rose, Acton M. Cleveland, and Curley Wigger.

CAMPTONVILLE, June 15.—Miss Harriet Church was hostess at a candy pull held at the home of her parents, Mr. and Mrs. R. R. Pfiffer a few evenings ago. A number of young people gathered and the evening waas spent in making candy, and playing games. The following were present: Misses Dorothy Hays, Anna Lang, Betty Wallace, Lola B. Cleveland, Harriet Church, Virginia Church, Cynthia Church, Bill Jones, Russel Reed, Katheryne Pauly, Elwin Harley, Lester Morria and David Church.

COMMITTEES ON ROADS TO MEET IN ALLEGHANY

Judge Inman of Downieville has called a meeting of the Sierra county road committee to meet in Alleghany (tomorrow) Saturday afternoon at 2 o'clock with the Nevada City Chamber of Commerce road committee of which Judge Tuttle is chairman. Judge Inman states that Earl Lee Kelly, head of the California Highway Commission, is expected to be present.

This is to be the joint highway committee meeting which was called some weeks ago in Alleghany but which was postponed due to bad weather and other causes.

ELKS TO INITIATE CLASS IN ALLEGHANY

Elk officers, accompanied by several members of the Nevada City lodge, will go to Alleghany tomorrow evening and initiate a class of candidates. The ceremony will be held in the Alleghany community house and will be followed by dance. The initiation will begin at 7:30 o'clock. Exalted Ruler Roland Wright states that a bang-up time is assured to all Elks who make the trip.

PROBATION GIVEN TO AUTO THIEF

Roland Mattox, charged with taking a car from a worker at the Zeibright mine, appeared in superior court Tuesday before Judge Raglan Tuttle, and was given a five year probation term, Mattox was arrested in Madera county and brought back here for a preliminary hearing and held to answer grand theft charges. Upon arraignment in superior court Mattox plead not guilty, and a jury was ordered to appear Tuesday, but Monday he decided throuh his attorney Harry McKee to change his plea to guilty, and notice was given the jurors not to appear.

The defendant asked that the offense be adjudged a misdemeanor under Section 503 of the Vehicle Law, which makes the charge of taking an automobile without the owner's permission, a felony or misdemeanor at the discretion of either court or jury Judge Tuttle refused to have the charge lowered to misdemeanor, and adjudged the offense a felony with a five year imprisonment in San Quentin, sentence to be suspended for that time. During this period the defendant is to be on strict probation

Mattox hasa a six year criminal record, and has been in the Nevada county jail three times within the past year for drunkenness, yet no felony conviction has been found against him.

F. W. Swinney pleaded guilty to passing bogus checks and on motion of A. W. McGagin, probation officer, was denied probation and sentenced to an indeterminate term in San Quentin.

MRS. CHAS. EDEN ENTERTAINS

Mrs. Charles Eden of Nevada City entertained members of the Third Wednesday Club at a dainty luncheon and card party at Bret Harte Inn in Grass Valley. The afternoon passed all to quickly in playing games. Prizes were awarded to Mrs. Chester Ravey and Mrs. J. P. Muscardini.

Mr. Clive Kelly, Sutter county assessor was a Nevada City visitor when he came up to attend the Northern California Peace Officers meeting.

WHISKERINOS MEET WITH WHISKERETTES

Tonight Nevada City Whiskerinos are to hold a meeting in Armory hall. After regular business has been transacted the meeting will be turned over to the Whiskerettes.

A group of Whiskerettes made a good will tour to Downieville yesterday calling on all towns along the route and extending invitations to attend the July 4 celebration in Nevada City. The following have been selected as candidates for the queen contest. Leona Pingree, Nita Walder, Peggy Moody and Etta Bankus.

One of the Whiskerettes is drawing a lot of posters and on them will be the words: "There's Always a Welcome to Strangers at the Door of Nevada City." The organization has planned a box social for next Friday evening. Dancing will take place after the meeting.

Whiskerettes making the trip to Downieville yesterday were, Mrs. Ruby Miller, Miss Anita Walder, Miss Fern Rockefeller, Miss Etta Bankus, Mrs. W. Buffington, Mrs. John Minarich and Mrs. Mrytle McKissick. The group sold tickets for the queen contest, in San Juan, Camptonville and Downieville.

STATE TO SPEND HALF MILLION FOR NEV. CO. ROADS

According to advices just received here the state will spend $515,990 on roads here in Nevada county during the coming fiscal year.

Since 1931 in Nevada county the state has constructed part of and maintained all of the 137 miles of state highways in that county. The total cost of construction and maintenance amounts to $1,579,227.00. In addition to this amount the state will spend $355,990.00 in new construction this year and has allocated to the incorporated cities of Nevada county from the gas tax the sum of $22,540.00 for street improvements making a total of $1,957,757.00 received by Nevada county for highways and city streets.

The list of proposed work follows:

Parksbar Bridge to 1 mile east of county line. Grade and surface. 3.8 miles. $150,000 Ukiah-Tahoe lateral.

Floriston to state line. Grade and surface. 5.0 miles. $50,000 Truckee-Reno road.

Fox Farm to Summit Station. Grade and pave. 3.8 miles. $145,000 Auburn Truckee road.

Minor improvements—Over Oak Creek. Reconstruct bridge. $990.

Between Rough and Ready and Grass Valley, Line change. $5,000.

Harmony Ridge to Bear Valley. Widen roadway. $5,000.

Will be approved by July first. Foot of Donner Grade to Junction of Route 38. $160,000. Grade and surface 4.7 miles.

PEACE OFFICERS HOLD MEETING IN NEVADA CITY

The Northern California peace officers association met yesterday in Nevada City at the Union Hotel. Judge Raglan Tuttle was the principal speaker of the day, Judge Tuttle spoke on the inefficiency of the indeterminate sentence, stating that the judge before whom a case was tried was in a better position to mete out sentence than the prison board of sentences. Judge Inman of Sierra county opposed this view, claiming that since the enactment of the indeterminate sentence law the sentences had been stepped up by the board 75 per cent.

Sheriff C. J. Tobiassen of this county presided as toastmaster over the meeting with Judge Langdon of Marysville as secretary. A banquet was served to 50 members and their guests at the Union Hotel. Entertainment was furnished by the Tobiassen children who did a tap dance and sang. Mrs. Chas. Elliott rendered a solo, and Mrs. Bennett and Mrs. Curnow gave a duet.

Chief of Police Garfield Robson and B. F. Wright of Nevada City and Undersheriff Will Woods also attended the meeting.

GRASS VALLEY STAGES DRIVE FOR WATT PARK

Next Sunday, June 21, the Community Service Council of ten civic and service clubs and organizations, aided and abetted by the Nevada County Whiskerino Club No. 57, Whiskerinos of the Universe, will stage a gigantic Maintenance Day at Watt Park, Grass Valley, to raise a sum of $1500 to halt a foreclosure judgment on the park, which will fall due at the end of the one year redemption period July 1.

The debt was acquired in the construction of a grandstand and fencing the baseball diamond at the park, of which the $2500 of publicly contributed funds fell $1500 short of paying the costs. Material firms sued for the balance, but will be paid on the proceeds of this successful event.

The Whiskerinos, fun organization of bewhiskered men in 49'er dress and the Whiskerettes, crinoline dressed women, are taking a large part of the maintenance celebration, sponsoring a Whiskerino dance at Lake Olympia Park on Saturday night, June 20, preparing a free chicken campstew for 3000 people on Maintenance Day, sponsoring the sports program and Helldorado and organizing '49er baseball games and tugs of war. Practically every organization in Grass Valley is preparing for a booth or concession at the park on the day to gather in the dimes, quarters and halves. A small city has been mapped with streets and alleys on which the concessions will face.

The day will close with a campfire program before the grandstand.

Gifts to swell the "Save Watt Park" fund have come from former residents as far as Seattle in the north and Los Angeles in the south.

CCC CAMPS WILL WORK ON GRAZING

Three Civilian Conservation Corps camps in California and forty two in nine other far western states will work on grazing rehabilitation projects during the coming Summer.

The assignment of the forty five camps to grazing control projects was announced today by Dayton E. Jones, the state registrar for the CCC, in making public a report by the division of grazing of the department of interior on CCC accomplishments in this field in recent months.

The California camps working of grazing projects are situated near the edge of Death Valley in the Inyo-Kern county area, near Secret Valley in the Redding area and at Juniper Flats near Redding.

The grazing division report to Robert Fechner, the CCC program director reveals a notable record of accomplishment in the work of rehabilitation of the public domain in the far west.

Following are some of the accomplishments of the CCC grazing camps in the ten far western states in less than a year

Acres treated for rodent control, 1,567,879.

Acres treated for eradication of poisonous weeds and plants, 60,821.5

Miles of truck trails completed, 712.3.

Miles of stock driveways, foot and horse trails and minor roads constructed, 362.9.

Improved and large diversion dams constructed, seventy.

Water control structures, other than dams included in the flood control, irrigation, and drainage projects, completed, 6.000.

Acres treated for erosion control, 137,300.

Permanent and temporary check dams constructed, 27,323.

Diversion ditches built, 23,774.

Bridges constructed, twenty three.

Miles of telephone line installed, 289.6.

Buildings not included in the regular camp buildings, such as garages, equipment and supply storage houses, barns and shelters, constructed, 10.

CONSERVATION WORK SHEET CLOSING DATE SET FOR JULY 15TH

July 15 has been set by the California State Agricultural Conservation Committee as the closing date for work sheets in California under the 1936 Agricultural Conservation Program, according to word from the AAA regional office at Berkeley. This action of the committee has been approved by George E. Farrell, director of the AAA Western Division.

The filling out of work sheets is the first step in the program. Should a farmer desire to cooperate later this year, or even in 1937, he will not be eligible for a federal payment unless he has filed a work sheet. The purpose of the work sheet is to aid in setting up soil-depleting bases which will be used in determining the farmer's contribution to soil conservation, his eligibility for payment, and the amount of payment due him.

Farmers who do not have work sheets can secure copies of them from the county farm advisor's office, or from their community committeemen. Filling out a work sheet does not obligate a farmer to cooperate. There will be no contracts to sign.

As soon as the work sheets are filled out, they go to the county committee, which establishes the farmer's soil depleting base acreage for 1936.

CITIZENSHIP EX WILL BE GIVEN TO 23 MONDAY

On Monday morning at 10 a. m. Z. B. Jordan, Naturalization Examiner of the Department of Labor will give the final examination to 23 people who wish to become citizens of the United States.

Those who have completed the requirements and asked to take the examination are: James Monaghan, Grass Valley, Daniel Saba, Truckee, Joseph Cukiati, Grass Valley, George Earles, Shingle Springs, Ida Gustafson, Grass Valley, Andra Armati, Truckee, Joseph Rumney, Alfredo Lippi, Pietro Moscatelli, Clarence Main, John McCrink, Gaspar Castellano, Phillip Personeni, William Prowse, and William Luke, all of Grass Valley, and Mrs. Maria Sbaffi, Pablo Falconi, Mrs. Rosa Ennis, William Gaughan, Oscaar Olson, Sigvart Ronningen, all of Nevada City, Andreas Exarhopulos of Marysville and Eduardo Lanfranco of Truckee.

TRAILER TOURING NEW TRAVEL TREND

The 1936 touring parade, which is expected to be the largest in history, will be featured by nearly one million persons enjoying the comforts of home along the highways in house trailers. This was the declaration contained in a report received by the California State Automobile Association from the nationwide American Automobile Association, with which the California motorists organization is affiliated. Discussing the recent increase in use of trailers, the report said:

"The increase in popularty of these "homes on wheels" in recent years has been nothing short of phenomenal. Growth in trailer use has been reflected at touring counters of affiliated A. A. A. clubs throughout the country, as trailer tourists require much more extensive tour mapping than average motor travelers. Previously, routings generally were made for a week or two, but the trailer owner frequently seeks information for a trip lasting a year or more and covering most of the country.

"Economy, comfort, and freedom of travel, have been the principal factors in the popularity of trailer homes. Persons fortunate enough to have comparatively long vacations yearly, and many retired business and professional men, make up a greater part of the trailer army. There is also a considerable number of people who now live permanently on wheels.

"Trailer manufacturing has become a lively new industry in the United States. Parks and camps, especially designed for trailer occupancy, dot the country, many providing special running water and electric light connections that can be fitted directly into the trailer bodies. Trailers have come to stay and it is more than probable that an ever increasing number of roaming bungalows will participate in the annual outpouring of highway travelers."

NEVADA CITY VETERANS GET $40,000 BONUS

More than 115 veterans have come forward to have their bonus bonds certified since Tuesday, according to Mrs. Betty Martin West, postmaster. The amount of these bonds totals $40,000 to Nevada City veterans alone. Mrs. West states that many more veterans will probably receive their bonds within a short time.

The branch postoffice at the Brand studio has been discontinued, but a special window has been set up for the veterans convenience in the postoffice which will handle the bond business while the demand warrants it.

Every bond bore the veterans name and to receive it or have it certified for payment he had to be identified by two witnesses. Most of them were able to do this immediately, although some had to go out to hunt witnesses who could identify them.

Every witness who guaranteed a signature of a veteran can be held responsible to the government for the amount of the bonds if delivered to a person not entitled there to. and if criminal intent should be shown then fine and imprisonment would follow.

EVANS TELLS NEEDS OF NEV. CITY AIRPORT

At the Rotarians noon luncheon yesterday at the National Hotel Bob Evans, Associated Oil distributor, who is an old time flyer and aviation enthusiast, gave an interesting talk. Among different things he spoke of the Nevada City airport or landing field, telling of its needs and about putting it into up-to-date shape. Mr Evans was introduced by Chairman Carroll Coughlan.

Seceral members of the Grass Valley Rotary club were in attendance and enjoyed the meeting.

CAMPFIRE GIRLS MOVE INTO CAMP ON LAKE VERA

The Nevada County Narrow Gauge railroad brought in the first group of 150 Camp Fire Girls yesterdaya from the bay district. They were taken to the Piedmont Camp Augusta on the shore of Lake Vera in three large trucks. Miss Rhea Rupert and assistants, came up Wednesday and had all in readiness for the girls.

One hundred and fifty girls will come in today for Camp Celio from Oakland. Miss Gladys Snyder, counselor and assistants have the camp in fine shape for the first group of young women.

A group of Camp Fire Girls from Sacramento are expected during this week end and will be taken to Camp Minaluta.

A little more than a ton of ice was delivered to Camp Piedmont yesterday from the Union Ice company plant in Nevada City. Besides ice many gallons of milk are also sold to the camps during the summer vacation period.

BLUE POINT GRAVEL MINE

Development continues to the east in the Blue Point gravel mine at Smartsville and employs 36 men. Two shafts were driven to handle ore and equipment, all operations being handled from one head frame. The Tintic Standard which is operating the property has spent thousands of dollars in development. In sinking in the lower levels many old uncharted workings were opened up.

History Speaks

(Contributed)

In these days when partisan argument is filling the air with a blue haze of verbiage, men ought to remember that there is still one place they can get the truth.

History, unprejudiced and factual, is always there to speak to any who will listen.

Someone shouts for this or that. Is it good or bad? Whatever it is, history will have a verdict on its past success or failure. There are few things new under the sun.

For example many people believe that the Single Tax, which will be on California's ballot in November, has never been tried, just because it has never been enacted anywhere in the United States.

Yet it has been tried, in Canada almost three decades ago where, of course, it failed miserably. The provinces of Saskatchewan and Alberta and the cities of Edmonton and Vancouver got into financial messes with it, and by 1918 were forced to return to sane tax methods.

Professor A. B. Clark of the University of Manitoba later summed up the experience thus:

"Generally speaking, throughout the municipalities of the three provinces where the Single Tax experiment has been tried, the result has been the same; a hasty adoption of the Single Tax policy—voluntarily or under legislative compulsion—during the years of real estate inflation, followed by the rapid contraction and disappearance of land values in 1913-14 and the accumulation of tax arrears and of debts."

That is the verdict of history. It is to be hoped that California will heed, and that men will not forget, in these argumentative times, that the most reliable informant in all things—is history.

PARENTS—WAKE UP!

DISPLAY AT NATIONAL HOTEL

The National Hotel in Nevada City has a displaay of several old registers, in the lobby, that are quite interesting. A large volume of 1869 carries a "Strangers Guide to Leading Business Houses in Nevada City." Among names listed are many prominent ones some being A. W. Lester and Co., George W. Kidd & Co., Banner Bros., Charles Ferrand, R. M. Hunt, M. D., Dr. A. Chapman; William Holmes, J. I. Caldwell, etc. The other side of the page carries names of hotel guests. This famous old hotel has sheltered and fed many famous men and women over a long period of years.

Miss Barbara Dell of Clearlake Highlands. Lake county, is visiting her school chum, Miss Dorreen Foreman of this city. Miss Foreman lived in Lake county with her parents before moving to Nevada City, and the girls are having a fine visit.

REV. BUCKNER RETURNED

Of 143 appointments made to the charges in four districts at the close of the 84th California Annual Conference of the Methodist church at Stockton in the last few days, Rev. H. H. Buckner of this city, was returned to the local pulpit. He has served faithfully in the local Methodist church at least 12 years. Mrs. Buckner also takes a deep interest in the work of the church and has served as president of the Missionary societies for several terms, resigning this spring after a successful term as president of the general aid society.

The Mattie Mine on Deadman's Flat southwest of Grass Valley, was reopened last week. Bert C. Austin, mining engineer of San Francisco, is backing the property which has been closed for about a year. Mr. Maguire of Grass Valley is superintendent.

ANOTHER SQUAWK

Grass Valley, Calif., 6-18-36.

The Nevada City Nugget.

Sir: I hope you will allow me a little space in your paper to relate some unreasonable Czaristic methods of the local director of the National Re-employment Service.

This fellow, without reason or regard for anyone else, applies his methods in a fashion that would indicate he was taking a correspondence course from Mussolini of Fascist Italy. I was employed on a WPA project, a new service, recently established in this county, making concrete "units" for outdoor sanitary toilets. I began at this work last April, with the understanding that if I qualified after a reasonable period of apprenticeship I would be entitled to the regular rate of wages ($55.00 per month of 120 hours) which is being paid for this class of work. I was recently told that I would begin receiving $55.00 per month beginning with the 21st instant. But in the meantime the local Czar, entrusted with the directorship of NRS for this county sent me word to come before his throne immediately, but instead, I finished my day's work, that day, the 11st inst. and then went before his throne. He began with the process of transferring my name, etc., from one card to another, and explained that that was being done in order to put all those previously registered on new cards. This was explained to me in such a cunning way that I almost heard a fox bark. Then he went to the typewriter operator to have her make out my new work order to transfer me to the grammar school work on the concrete gang wheeling gravel to the mixer. Before I started to sign my new work order I attempted to explain my situation, but he again employed his Czaristic method, and told me that I would have to accept that or be dropped. As it happens there are bigger and stronger men on the project I was working on than myself. And me being a runt, weighing only 130 pounds, and considering the advantage I was entitled to after my apprenticeship, he picks me out for a heavy job and gives a bigger and stronger man the job I had. Without consulting my foreman, myself or anyone else as to ascertain which would be the one that the foreman could let go with the least disadvantage to the project, but instead he blindly went about with his bunglind method regardless of the consequences. He proved his bungling method by placing a new man to fill in on the project he transferred me from,. For such inconsistent, unreasonable methods, no doubt all his own, he receives a handsome salary. No doubt that Roosevelt's good intentions were, and are; that the various projects should be run with the least possible amount of friction consistent with the maximum amount of efficiency.

ANTON BUTCH.

GEORGETOWN TO HOLD FOURTH CELEBRATION

GEORGETOWN (El Dorado Co.), June 19.—Georgetown celebrates the Fourth and honors its pioneers with a big two day celebration on July 4 and 5. This is the first event of its kind here, and also is the first town celebration to be held since 1910.

There will be a parade on July 4 at 11 a. m. which will be lead by a queen. The queen is being chosen by popular vote and the contest is centering about four lovely young girls.

Features of the celebration will include a free barbecue, dancing, a baseball game with Vallejo on the Fourth and another game on the fifth, old fashioned sports of all kinds, including a greased pig, greased pole, races for everyone, and all with cash prizes.

Georgetown was settled in 1850, and is a quaint old mining town where the past is rapidly being forgotten in the mining boom of the present.

WESTERN MERGER PROPERTY

It is reported a good ledge containing rich ore has been encountered in prospecting on the old Western Merger ground north of Nevada City, which is owned by the Davis Brothers. About eight years ago Mr. A. A. Codd and several other mining men shrunk a shaft and took out splendid ore for some time on this property Unfortunately in following this ledge at the old site they came to their boundary line and larger mining machinery was needed to sink to lower levels causing the property to be closed. It is thought the new site will give sufficient ground for extensive development and mining.

NEVADA CITY NUGGET PROVERB CONTEST

FUN FOR ALL AND $10 IN CASH TO THE CLEVER WINNERS!

CONTEST RULES

Each week for a period of six weeks The Nevada City Nugget will print one of a series of cartoons representing some well known proverb or saying.

Contestants solve the picture puzzles by writing the proverb that the cartoon suggests or illustrates in the blanks below the pictures.

The prizes, totaling $10 in cash, will be awarded those sending in complete or near complete picture sets with the best and most appropriate answers to the pictures published, and either paying their own subscription for a period of one year or securing one new one-year subscription to The Nevada City Nugget.

Cartoons should not be sent to the paper until the series is complete.

Only one answer may be given to a picture.

Only one member of a family will be given a prize, the award going to the person in that family submitting the best set.

The answers may be written in pen, pencil, printed or typewritten.

PRIZE LIST

First Prize ..... $5.00 in Cash
Second Prize ..... $3.00 in Cash
Third Prize ..... $2.00 in Cash

PROVERB NO. 4

The proverb answer is .....

.....

My name is .....

Address .....

ENGINEER TELLS OF ROUND SHAFT DRILLING WORK

(By J. B. NEWSOM)

You have asked for a summary of our shaft drilling results, setting forth the points most likely to be of interest to operators.

The work was done with a core drill, shot type, drilling a hole five feet in diameter. The essential difference between our drill and other core drills, aside from its size, is that the entire mechanism goes in the hole. Thus, as the hole deepens no time is lost handling drill rods, and no rod tower or rod handling tackle is needed. Also, because the operator is down with the machine, he can closely control the operation.

Number Two Shaft was put down 1,126 feet, with this rig at a total cost lower than would have been possible sinking a single compartment shaft by conventional methods. The cost was lower in spite of the fact that we were developing our methods as the work progressed. An idea of the effect of the experimenting may be gained from the fact that 38.5% of the time during the last six months was spent on operations other than sinking. In other words, 61.5% of the time was spent on direct sinking, and the balance learning how to perform various operations, building up hoist capacity, and so forth.

WALLS STAND WITHOUT SUPPORT

Since practically no powder was used on the job, the walls stand without support in most places. However, we went through some very heavy ground, which we supported with reinforced concrete. The cost of this averaged ten dollars per foot of shaft supported. To date, none of the cemented ground, and, in fact, none of the uncemented ground, has shown any signs of moving. Most of the cementing was done during May and June, 1935.

At first it was planned to strip the sides of the finished shaft and timber it, but since the ground stands so well that idea was abandoned, and steel guides put in the original hole, without lining it in any way. The guides are fastened in place with anchor bolts, leaded into the rock. Thus, the finished shaft is absolutely fireproof, as there is not a stick of timber in it, except through the forty feet of surface alluvium and at the stations.

The distance between guides is 48", which leaves room for several electric cables behind each guide. The hole is round, of course, so the cage floors will be rounded at the ends and flat at the sides, a sort of oval cross section. A three deck cage is being installed, each deck to accomodate ten men.

There were several reasons for putting this shaft down. One was to provide ventilation. Since the hole is round, and the sides are smooth, it is ideal for that purpose. Several months ago, a connection was made with the lower workings. A rough check indicates that about 3,500 cubic feet of free air per minute is flowing into the mine through this connection.

FORMATIONS

Another reason for putting the shaft down was to determine the feasibility of the drilling method for various types of ground. The shaft was drilled through gabbro, serpentine, ankerite, gouge, diabase, and vein structure. The ankerite and gouge had to be supported, but except for the added trouble of cementing ankerite and gouge none of the ground encountered gave us any real trouble.

A good many technical problems were solved, not the least of which was to find a method of pulling cores in bad ground How well we succeeded may be visualized from the accompanying picture of a core. single piece and fell apart as shown It was pulled from the hole in a when the core pulling device was released.

Another problem was to keep the hole running vertical. Before this problem was solved we had to straighten the hole twice by blasting a cavity in the side wall large enough to enable us to re-plub the drill. The third time we straightened the hole it was done by turning the hole during the regular drilling operation, with practially no loss of time.

Number Two Shaft did not make much water, the heaviest recorded flow being about three hundred gallons per hour (7,200 gallons per day). Several apparently feasible methods of handling heavy flows of water have been suggested.

TWO MEN PER SHIFT

Three shifts per day were operated, two men being on each shift, a hoist man and a driller. In addition there was a foreman, responsible for the general conduct of the work. He worked odd hours. We had only one serious accident, resulting in a broken leg. However, it happened at night, and help had to come about half a mile before the man could be brought to the surface. Though the method is inherently very safe, this feature of having only two men at the job, each inacessible to the other in case of an accident, is not good. If other workmen were near at all times, it would be all right.

At various times, such as when we were breaking in new men, or were trying some new method of operating, three men were kept on the job continuously, simply as a safety precaution.

Since the work was largely experimental, careful record was kept of the way the crew spent its time. From a study of the drilling cycle, as disclosed by these logs, it is apparent that two holes side by side could be drilled almost as fast as a single hole, and for very little additional cost. In this case, three men would be used per shift, one for each hole and the third running the hoist.

The method could be used wherever electric power is available. Compressed air is unnecessary. A small blower would be needed for ventilation, as the drill produces heat, and as such foul air as is produced tends to settle in the bottom of the hole.

1200 FOOT HOLE FEASIBLE

With our present knowledge of operating methods, holes 1,200 feet deep seem perfectly feasible. If deeper holes were desired, it would probably be wise to cut an auxiliary station at the 1,200 foot level for the power cable, small tools, and so forth.

One thing learned was that unskilled men can not make satisfactory headway with this method. They make serious mistakes and have accidents until they have been on the job for several months. I should say that any operator using the method should capitalize on our experience by hiring some of the men that worked on Number Two Shaft.

Operators often ask how fast the method has proven. During one period, when the operation was working smoothly we drilled 162 feet in 34 days, an average of 4.75 feet per day. If we eliminate the

DISCOVERY OF CHINA LED TO DARWIN THEORY

BERKELEY, June 18.—China's influence on European thought of the sixteenth and seventeenth centuries paved the way for the ultimate development of the Darwinian theory of the evolution of man.

This is the interesting theory advanced by A. H. Rowbothah, assistant professor of French at the University of California, in an article entitled "China and the Age of Enlightenment in Europe." The essay appeared in the Chinese Social and Political Review for July, 1935, and has sence been reprinted.

According to the author, it was the contact with a strange culture in the Far East which broke the bonds of European consciousness and led to the destruction of the theory of the Great Flood.

The explorations of the Portuguese in the sixteenth century discovered China for the West and produced a flood of literature concerning the beauty and worth of the Chinese civilization. In this literature were contained frequent attempts to determine the beginnings of the Chinese history. The most conservative of these dates failed to harmonize with the date set for the Flood which had been the only generally accepted date in Christian chronology.

The result was the destruction of the Flood theory and a revision of the ideas concerning the age of the world and its chronology. Out of this grew the idea of the slow growth of society through a vast period of time which the author calls "the greatest step in the development of man's knowledge of his environment and history."

Story Of Old Gold And Crimson Conifers

In the early mining era the business, mining, and intellectual center of that section of Nevada county commonly known as the Ridge, was North San Juan, then a thriving mining town, lying at the foot of San Juan Hill. The first settler in the immediate neighborhood was one Christian Kientz, who prospected on the west end of San Juan Hill, and in the spring of 1863, in connection with another miner, developed the rich Gold Cut mine. To this enterprising pioneer is ascribed the honor of naming the hill from which the town afterwards derived its appellation. The reason given for his applying the name San Juan, so unusual in the northern mines, is curious and indicates a remarkable fertility of imagination that does great credit to the author.

Tradition says that Kientz had been with General Scott's army in Mexico and that one day on approaching San Juan Hill he was impressed with the resemblance it bore the hill of the castle of San Juan d'Ulloa, and named it accordingly. However correct this may be, it is certain that the name is and ever will be San Juan.

In the first flush of its youth North San Juan contained many beautiful homes. A large number of people from San Francisco settled in a long string of magnificent houses on the grassy slopes of North San Juan and the strip of ground whereon they located, in a few months' time, became San Francisco street. The first brick business building was erected in 1856, and was occupied as a grocery and provision store house by a company of two men who preferred to receive gold dust across polished counters to digging it out with picks and shovels. The brick section of this building is still standing but is slowly succumbing to the elements.

The world's first long distance telephone was the Ridge Telephone Company which was organized in 1878, and had its principal office at North San Juan. The line was owned by the Milton Water and Mining Company, the North Bloomfield Gravel Mining Company, and the Eureka Lake and Yuba Canal Company. The line was sixty miles long and ran from French Corral to Milton Dam with a branch line to Foucharie; in all there were twenty two stations on the line, and the chief use it was put to was the management of the ditches and mining claims.

North San Juan has stubbornly refused to be classed as a ghost town While her sister towns have become victims of time and the elements, the citizens of North San Juan have united themselves into a league of mutual improvement and steadfastly cling to their homes and farms The lack of water has been a great handicap to the improvement of the town The rich acres of grain and fruit land are bare. During the summer months the whole country side is burned by the sun and every particle of green shrubs and grass becomes dry and brittle But there is a strong belief that in the very near future there will be an abundance of water which will be piped into the town by mining concerns that expects to begin hydraulic operation within the coming year.

The old timers can remember, when hylraulic mining was permitted, that there was water—worlds of water—available at all times and North San Juan was a locality of green grass-carpeted slopes whereon was situated hundreds of beautiful well cared for homes. The yards were laid with cool grassy lawns, flowers in great aundance bloomed everywhere and the gardens and orchards yielded acres of strawberries, nuts, and fruits. North San Juan has always been an extremely healthful district. Its high altitude and plentiful supply of clean air and warm sunshine have made it a haven for those who suffer with asthma and hay fever. At one time there were three thousand people in this town.

In those days there was located in North San Juan a bank, express office, clothing stores, churches, saloons, and schools. Great freight wagons drawn by mules passed in and out of town. At times two and three wagons were chained together and were drawn by sixteen head of mules that plodded along the dusty roads with twitching ears and bells jingling on the leaders. On these wagons, freight was piled high to be distributed to Bloomfield, Moores Flat, Graniteville, and Downieville. In those days the pioneers were known to buy barley by the seven ton lot for theih hogs and cattle.

Many of the sailors who deserted their ships in the bay of San Francisco and swarmed into the foothills to be miners drited into Nevada county, And it was to North San Juan a certain amount of them came—these sailors with their maritime ideas. And one day they decided, in one of their sea going moods, that the town should have a flagpole. And then with a sailor's crafty knowledge of bowlines, halyards, and the knots they stepped two masts together with a yard arm at the peak and rigged a flagpole two hundred feet high amidships the main street.

Mike Hogan lived in North San Juan in the days of 1849. And it was Mike Hogan who ran the livery stable and owned the magnificent hand made hearse that was brought to California via the Horn and may be seen to this day in the old bank building that stands in fading glory. To this beautiful hearse Mike Hogan hitched two magnificent coal black horses and two men in deepest mourning sat on the high seat up front. If the deceased was an adult six great black feathery plumes, three to a side, drooped upon the top of the hearse in majectic sorrow and another pair, one for each horse, graced the animal's bowed necks. If the deceased one was a younger person the hearse was draped similarly in plumes of white.

Delightfully situated on the Ridge down which runs the pliocene river channel, on the road from Columbia Hill to North Bloomfield, is the little town of Lake City. At one time this village contained one hotel, a merchandise store, saloon, blacksmith shop and several residences. Situated at the junction of the North Bloomfield gravel channels with the one from Blue Tent is Columbia Hill. In 1853 mining operations were commenced and in 1855 a man opened a store and the settlement became a village with a postoffice of its own.

Once flourishing, but now almost extinct, is the locality known as Cherokee. The name was derived from a tribe of Cherokee Indians from what is now known as the state of Oklahoma, who moved here in 1850. The little village of Birchville is situated on the gravel channel three miles south of North San Juan, and at one time it was the cented of extensive mining operations. The nearby town of Sweetland was early noted on the Ridge as a trading post and gradually become settled. It has been and may be again, in the near future, a scene of extensive mining operations.

French Corral is the last of the series of mining towns that lie on the Ridge between the middle and South Yuba rivers. A corral was built at this point in 1849, by two Frenchmen from Frenchmen's Bar on the main Yuba, to be used as an enclosure for mules. From this fact the locality and afterwards the town, received the name of French Corral. Mining was carried on in the ravines about this place in 1849, and a man opened the first store in a tent. Afterwards this man sold his business to an English sailor who in turn sold out to two brothers who erected a log house near where the historic old Corral House now stands.

All along the Ridge from Lake City to French Corral were the greatest hydraulic mines in the world but today all is dreary desolation. These deserted ghost towns sit forlornly on their mounds of pine and madrone trees and with infinite patience await the day when aided by huge restraining dams to impound the "tailings" once more the giant monitors shall wash down their golden gravels. All through the dismal years of panics, wars, and depressions the wise little towns have made no effort to keep secret what the learned engineers have just begun to discover—more gold remains in these ancient channels than has ever been produced in California.

(THE END.)

YOUR RAILROAD GOES MILES TO MAKE FRIENDS

Here's service! And speed! And accomodations that your Nevada County Narrow Gauge Railroad delights in giving!

A freight order placed in San Francisco, Sacramento, Stockton or other area points, before four o'clock in the afternoon will be delivered in Grass Valley or Nevada City—at the doorstep of the consignee—at 9 o'clock on the following morning.

Freight shipments at Los Angeles, ordered prior to four in the afternoon are delivered in Grass Valley or Nevada City at 9 o'clock on the second day after order is placed.

Then too, there is the convenience of shipper sending bills direct to the Narrow Gauge offices for collection purposes. This feature saves correspondence, billings, receipt returns and additional bookkeeping.

Prompt deliveries, effected by a combination of punctual rail schedules and motor truck door-step delivery makes the "few-hour-from anywhere" possible. That, and the daily effort of the Nevada County Narrow Gauge Railroad to better its efforts to serve and please.

In the background is "railroad reliability," wherein the iron-clad rules and regulations of the California Railroad Commission play a commanding role. Shipments, too, are insured against loss or damage.

Your railroad takes the business of the Grass Valley and Nevada City merchant to heart. It does everything in its power to assure promptness of schedule, safety or shipment, and a maintenance of low-level carrying charges.

NEVADA THEATRE SHOWS FINE WEEK-END BILL

The interesting theme of "Two in Revolt", which comes to the Nevada Theatre Friday night, is said to make it one of the year's more unusual pictures. Drawing a parallel between two story motifs, the friendship between a pedigreed stallion and a half-breed dog, and the romance between a society girl and her father's horse trainer, "Two in Revolt" brings to the screen a list of stars headed by John Arledge and Louise Latimer.

On Saturday night the mystery thriller "Moonlight Murder" will be shown. Music piles on mystery and mystery on music in the screen's first operatic detective story in the amazing drama of the killing of an operatic tenor before an audience of 20,000 in the famous Hollywood Bowl. Chester Morris, Madge Evans and Leo Carillo are the stars.

"Boulder Dam," a Warner Bros. production heralded as a drama of thrilling action, heroic deeds and glamorous romance is scheduled as the feature attraction at the Nevada Theatre for Sunday night. The story is laid on the scene of the building of the mighty Boulder Dam and stars Ross Alexander and Patricia Ellis.

Personal

At a regular meeting of the Entre Nous club at the home of Miss Dorothy Feagans on Drummond street, Tuesday evening, Mrs. Valencia Hurst, was given a surprise linen shower. Twelve members were present and the club had as guests, Miss Elinor Peterson of Berkeley and Miss Naomi Whitley of this city.

Mrs. Harry Evans, who was injured in an auto accident at Hills Flat several weeks ago, was taken to the University Hospital in San Francisco this week. for treatment. She has been in Jones Memorial hospital in Grass Valley for some time, and is practically recovered except for loss of voice. Latest reports are she is getting along nicely. Harry Evans, her husband and a Nevada City boy, is employed by the Plaza Grocery store here.

Mr. Alex Sauvee of Grass Valley and brother, Fred Sauvee, of this city, distributors for the Coca Cola products, and their employees were guests of the Coca Cola company at a dinner at the Bret Harte Inn Tuesday evening. Messrs. Elton Kendrick, Pat Courser and Pete Orzalli, employees, of Nevada City attended the dinner.

Mr. Walter Carlson, principal at the Washington grammar school, left Monday for his home at Arcata, Humboldt county, where he will spend the summer.

Mrs. Clayton Chatfield and three sons of Nevada City left Friday for Calaveras county to spend the summer, with Mrs. Chatfield's husband, who is superintendent of the Buffalo-What Cheer gravel mine.

Porter L. Bliss, Grand Secretary of the Improved Order of Redmen, was a Nevada City visitor on Wenesday. He left yesterday after renewing many old friendships and acquaintances in this community.

Mrs. John McQuay returned home Tuesday from Landis Clinic in Grass Valley having underwent a tonsilectomy Monday. Her daughter, Miss Catherine McQuay of San Francisco, came up to be with her mother for a time.

Mrs. George W. Downey, who has been gone three months, visited her daughter, Mrs. Earl Beatty of Sanger, Mrs. R. H. Sherwood of Kerman and on south to Los Angeles where she visited a sister, Mrs. M. S. Evans. She attended the Nevada county reunion Sunday, June 14, in Los Angeles and saw many old friends. Mrs. Downey will return home Saturday, June 20, with her daughter, Mrs. R. H. Sherwood and Miss Margaret Smittcamp, the latter will spend the summer here.

In the last few days many old timers in Nevada City commented on the thousands of feet of 3x16 inch, 32 feet long clear lumber being delivered by the Nevada County Lumber company to the grammar and high schools under construction in this city. These materials are similaar to those used in earlier days. Mr. Oscar Odegaard, manager, stated considerable difficulty was experienced at times in keeping the trucks from upsetting as they climb steep turns in the city with the long timbers.

The new home of Mr and Mrs. Leon Christensen at Nevada City's northern limits is almost complete and they will move in a few days, from their present apartment on Sacramento street.

Mrs. William Lewis of Sugar Loaf north of Nevada City is expecting a visit from her daughter, Mrs. W. H. Jewel and two sons, Albert and Wilbert, of Kansas City.

Mr. Ed. C. Uren, mining engineer of this city, made a business trip into Trinity and Siskiyou counties last week, looking over several mine properties while away.

Mr. Tony Fradelizio left Wednesday for St. Helena where he entered a sanitarium to receive treatments for illness.

Mr. A. A. McNulty, former resident of French Corral and Nevada City, has returned to New York from a trip in Old Mexico. He is employed as an assistant engineer for the Nichols Copper Company in Brooklyn and New York.

Mrs. Jay Roberts of Gold Flat entertained members of the Gold Flat Quilting Club at her home Wednesday afternoon. A delightful time was spent in making quilt blocks for another one of their beautiful quilts.

Robust Spring Zephyrs Reveal Federal Waste

Chicago, Ill.—There was something in the wind in the neighborhood about the warehouses on North Water street here, and it wasn't lilacs. Investigators discovered that the aroma, robust and overbearing, emanated from the Federal Surplus Commodities corporation's storage rooms where 38 carloads of onions were stored.

Twenty WPA workers were loading spoiled onions, which had sprouted and rotted while waiting for the FSCC to distribute them to families on relief. Workers said the stuff was being hauled away to be dumped, but John Thompson, the foreman, denied it, explaining that it was being distributed to "people with gardens" for planting. However, when a reporter started following one of the trucks Thompson called it back. Warehouse officials refused to let anyone into the building to find out how much of the supply was spoiled.

Additional Federal Liabilities

Washington.—Not included in the Treasury department's staggering estimates of the United States national debt, which place it at 34½ billions by June 20, are the bonds of various government corporations which the government has guaranteed. These total another 4½ billions.

Spending in Lucid Terms

Washington. — The $11,001,083,884 spent by the Roosevelt administration up to the middle of May for industrial "pump-priming" and relief is nearly twice the amount of all the money in circulation in the United States.

Farmers Can't Get Help; WPA Jobs Lure Hands

Springfield, Ill.—From all over Illinois directors of the Illinois Agricultural association are receiving complaints that farmers cannot obtain sufficient help this spring because the men they customarily hire now work for the WPA and prefer the easy work and good pay to the more rigorous tasks of farming.

Farmers in past years have been able to get skilled help for $25 or $30 a month and keep, according to the association. "This year farm hands in many cases refuse to take jobs on the farm and frankly say that they would rather work for the WPA three or four days a week," says an IAA statement. "They say that while the farm wages with board give them more money than the $54 a month WPA wage, they prefer to work less and take less pay."

A survey by a Rockford newspaper showed a need for 1,000 farm hands in Winnebago, Boone and Ogle counties. L. W. Braham, Will county farm adviser, reported many appeals from farmers for help.

"The farmers resent the idea that they are unable to get help when there are so many men on relief," said Braham. "These farmers say the relief situation has reached the point where they must compete with the federal government."

Similar complaints were heard in Kankakee, Cook, De Kalb, Du Page, La Salle, Vermillion, Champaign, Edgar and Douglas counties. Of recent weeks shortage of help has been reported in Minnesota, Wisconsin, Michigan, Kansas and other states, because hands preferred to work for the federal government and let the taxpayer foot the bills.

APRIL SHOWS INCREASE IN PRIVATE EMPLOY

Widespread gains in private employment and a striking increase in the number of placements made in public employment at prevailing wages characterized operations of the United States Employment Service during April, according to the California State Employment Service.

In a summary received today from Roy S. Stockton, director of the state service, who has just returned from Washington, D. C., it is shown that the gains were accompanied by a marked decrease in the number of persons registering for work at employment offices and a decline in the total active file of persons actively seeking jobs through the public employment system.

"The offices of the California State Employment Service placed 16,095 men and women in private employment in April, which put this state third among all states. Illinois was first, with 33,380 placements and New York second, with 20,684. The nation wide figures have just been made available by Washington for the month."

San Buenaventura Mission Founded 1782

Planning the conquest of Upper California, Inspector-General Don Joseph de Galvez, from his Mexican headquarters near La Paz, as early as September 15, 1768, wrote to Father Junipero Serra that the third of the Franciscan stations to be established in the new territory should be named San Buenaventura. The first, Galvez said, would be at San Diego, the second at Monterey and between those two points there should be "the intermediate mission which shall be called San Buenaventura."

However, through no fault of either Galvez or Father Serra, Mission San Buenaventura was the ninth instead of the third mission founded in California. Its creation was delayed twelve years, according to Fr. Englehardt, because of clashes between the military and the Indians at Mission San Gabriel arising out of mistreatment of the natives by the soldiers there.

San Buenaventura was founded by Father Serra on Easter Sunday, March 31, 1782, on a site which had been discovered and claimed for Spain by the great navigator, Juan Rodriguez Cabrillo, on October 10, 1542, fifty years, almost to a day, after the landing of Christopher Columbus.

Cabrillo was hospitably received by the Indians, treated them kindly and then sailed away. Sixty years later, another Spanish explorer, Sebastian Vizcaino, dropped anchor there and later recorded the friendliness of the natives. Vizcaino continued on northward and found Monterey Bay. For one hundred and sixty seven years after his departure this section of the future California remained unvisited by white men. And then in the spring of 1769, Gaspar de Portola set out with an expedition from San Diego to relocate Monterey bay accompanied, as we know, by Fathers Juan Crespi and Francisco Gomez. Once again the white man came to the land that was to become known as San Buenaventura and the discerning Crespi marked it down as a suitable site for a missionary station.

"I name this pueblo Ascuncion de Neustra Senora," Father Crespi wrote at the time in his diary, "and I hope that such a good site to which nothing is lacking will be a good mission through the intercession of this Grand Lady." Father Crespi was impressed by the number of Indians living there and the opportunity offered to win converts to Christianity.

At the feast of Corpus Christi, celebrated for the first time at Mission San Carlos de Monterey on Sunday, May 30, 1771, Junipero Serra, Fr. Presidente of the Missions, appointed Fathers Antonio Paterna and Antonio Cruzado to proceed to Ascuncion de Nuesta Senora and establish Mission San Buenaventura. The two sailed to San Diego and then set out with Captain Fages and soldiers for their new field. As we have seen, they arrived at Mission San Gabriel during the Indian revolt against the military and Fages refused to go on, strengthening the garrison of San Gabriel with the troops intended for San Buenaventura.

It was not until March, 1782, that Father Serra, at aconference with Governor Neve at Mission San Gabriel, obtained permission to found San Buenaventua. He marched north with Neve, but before the expedition reached its destination, the governor was recalled for a campaign against the Yuma Indians and Father Serra went on with Fr. Pedro Cambon and a small bodyguard. On March 31, Father Serra raised and blessed the cross on the chosen site, celebrated high mass in a brushwood shelter with the aid of Fr. Cambon, who constituted the choir and Mission San Buenaventura came into existence.

Father Serra remained at San Buenaventura for three weeks and then returned to Monterey from where he dispatched Fathers Francisco Dumetz and Vicente de Santa Maria to the new mission to relieve Father Cambon, who, meantime had administered the first baptism to the new born son of Eugenio Valdez, soldier, and Sebastiana Quintexa, his wife. This was on April 27, 1782.

The old mission register shows that by the end of 1875 there had been 133 baptisms; that in 1786 there were 112 converts during that year, and that in 1769, some thirteen years after the founding of the mission, the number of baptisms had reached 1,100.

Visiting San Buenaventura in November, 1793, Captain George Vancouver, English navigator and historian, noted in his diary the prosperity of the mission and added that the first church of the station had been destroyed by fire. He gave no date. Fr. Englehardt reached the conclusion from study of the baptismal register that if such a disaster occurred it took place between December 9, 1791 and June 21, 1792.

Fr. Presidente Lasuen reported to the government on March 11, 1795 that the church of San Buenaventura constructed of masonry, was about half completed and from that date on to September 10, 1809, the mission fathers made frequent reports on progress in the building of the church, granaries, adobe houses for the neophytes, a tannery and other structures, including a chapel for the Indian community near Casita. Solemn high mass was celebrated for the first time in the new church on September 10, 1809. The first baptism in the new edifice took place on September 30.

San Buenaventura was badly damaged by the earthquake of December, 1812, and it was not until July 14, 1815, that restoration work was finished.

In July, the year of the earthquake, Father Jose Senan, senior missionary at San Buenaventura, was appointed Presidente of the Franciscans in California. His labors of love brought remarkable progress to the mission and enrichment of the church and vestry with various church goods, paintings and interior beautification in spite of the fact that from 1811 to the end of the missionary period, San Buenaventura was compelled to pay heavy tribute to the support of the military, which had ceased to receive pay, clothing or food from Mexico as a result of the revolt against Spain.

(Continued on Page Seven)

ENGINEER TELLS OF DRILLING WORK

(Continued from Page Three)

time spent abnormally from the record of the last six months, the sinking record works out at 4.32 feet per day It should naturally be lower, because the hole was near its maximum depth when the record was being made. During a three day period, we drilled 21 feet, and during one 24 hour period we completed two drilling cycles for a depth of over ten feet. I think the speed should easily average ten feet or more per day when we have applied the advances in equipment and operating technique which are now apparent.

One question often asked is how large a hole can be drilled. We can drill any diameter hole above four feet, but I am not sure how large a core can be efficiently handled. Since the core from a five foot hole weighs about a ton and a haalf per foot in length, it is obvious that the core weight from a very large drilled hole would be such as to require very heavy tackle. If the method were to be used simply as a method of producing smooth, unshaken walls, the spoil being broken and mucked, I should say there is no upper limit to the possible diameter.

ALASKA MINE

Two more men were put on at the Alaska mine north of Nevada City early this week making six employed. Two large electrically equipped pumps have unwatered the old shaft to the 250 foot level and work will continue until the heavy flow of water is controlled. Mr. R. C. Eisenhauer, mining engineer is in charge.

SAN BUENAVENTURA FOUNDED 1785

(Continued from Page Six)

Already overburdened with worries created by the constant demands of the Santa Barbara presidio, as revealed by the preserved correspondence between him and Captain Jose de la Guerra of the presidio, where in the priest repeatedly protested against the injustice of throwing support of the soldiers and their families upon the mission Indians. Father Sena was given additional grief by a tragic incident occurring on May 31, 1819.

On this day a band of Mojave Indians came from the sierras of the Colorado river to pay a visit to Father Senan. Doubting the sincerity of the natives, Corporal Rufino Leiva had them incarcerated in the guardhouse. He refused the priests' pleas for their release. The following morning, the corporal punished one of the Mojaves in the stocks and his comrades, in great anger, forced their way out of the prison, killed Leiva and in an ensuing battle between them and the neophytes and soldiers nine lives were sacrificed. This affair aroused the Indians of the Colorado to fury and for several years they exacted revenge by attacking settlers.

Although a friend of the missionaries, Captain de la Guerra several times sought to obtain mission lands for the government and old records reveal Father Senan's fight to save Rancho de Piru for his charges. An impassioned protest to Governor Sola in February, 1822, evidently won a victory for the missionary for we find the governor refusing to take Piru from the Indians. Father Senan died on August 24, 1823.

The story of San Buenaventura during the hectic years of Mexican political misrule under successive territorial administrations, which brought about destruction of the California missions and seizure of their lands, is similar to that of the missions dealt with in preceding installments of this little history of the Farnciscans. San Buenaventura suffered at the hands of Governor J. M. Echeandia and his successors as did the other missions. However, it appears that this mission was more fortunate than the others in having Rafael Gonzales as civil administrator. Gonzales took over the station in June, 1836, and when William Hartnell, Inspector General of Missions, arrived there in June, 1839, he found the temporal affairs of San Buenaventura in good shape and his inventory showed 2,208 head of cattle, 1,670 sheep, 799 horses, 35 mules, 65 goats and 15 mules.

Governor Pio Pico completed the ruin of San Buenaventura. He appointed his brother, Don Andres Pico and Don Juan Manso as commissioners to "lease the missions". San Buenaventura was leased to Narciso Botello and Jose Arnaz on December 5, 1845, for an annual rental of $1,630 and on June 8, 1846 was sold to Arnaz for $12,000, no part of which Pico paid to the Indians for the mission fathers. The United States government, following American occupation, declared this and other mission sales illegal and on May 23, 1862, President Lincoln signed the proclamation returning San Buenauentura to the Catholic church.

First steps toward restoration of the old mission were taken by Fr. John Comopla, who was resident missionary at San Buenaventura from 1861 to 1877. With the advent of the Southern Pacific railroad in 1887, Fr. Ciprian Rpbio started extensive improvements and planned to erect a parish school. The school was not completed until August, 1922, when the Sisters of the Holy Cross took charge. For the preservation of old treasures and relics the Mission Museum adjoining the mission was erected in 1929. Here are the only two wooden mission bells known to have reached California in the daays of the early padres. The Society of Venture Pioneers and the Native Daughters of the Golden West have done much to make San Buenaventura and the Mission Museum the attractions they are today. Back of the mission is the famous Cross on the Hill, erected by the Ventura Chamber of Commerce in 1913 to replace the one blown down in 1875, which was the successor to the original cross raised there at an uncertain date. Many believe the first cross was erected by Father Serra, but this Fr. Englehardt mission historian, doubts because no mention of it ever was made by Palou, faithful chronicler of Junipero.

Motorists following the "Trail of the Padres," from south to north have the choice of three delightful routes out of Los Angeles to Mission San Buenaventura. One leads through Hollywood and historic Cahuenge Pass over the Coast Highway (101); passing Calabasas, then over Conejo Pass and past Camarillo to El Rio, junction of the Coast Highway and Roosevelt Highway, just north of Oxnard, thence about six miles to Ventura and Mission San Buenaventura, which is on Main street, at Figueroa, close to the business section of the city.

Or the visitor may leave Los Angeles by way of Wilshire Boulevard to Santa Monica and follow the shore-line along Roosevelt Highway through Oxnard to El Rio connecting with the Coast Highway to Ventura.

Mission visitors motoring from Los Angeles to Mission Buenaventura by way of Mission San Fernando follow Bradway to San Fernando road, thence through Glendale and Burbank to San Fernando where the route is west through Moor Park and Saticoy over State Route 118 to its junction with the Coast Highway just south of Ventura.

Motoring from the north to San Buenaventura, visitors may come down the San Joaquin Valley over the Inland Route, State Highway 4, to Bakersfield, proceed southwest through Taft to Maricopa and follow the new Ventura-Maricopa state highway to Ventura, or, they may follow the coast highway from San Francisco county to to Ventura.

Next: Mission Sato Barbara.

SCOUTS SEEK CAMP PAHATSI ON JULY 5TH

The opening day of the 1936 camp season for Boy Scouts of Placer and Nevada counties is just 17 days away. Starting Sunday July 5th Camp Pahatsi will be in session for three one-week periods until July 26th. Present registrations are one week ahead of the same date last year so apparently camp will be larger than last year.

Local Camp Committee Chairman Leland Smith believes parents should make every effort to afford their boy the opportunity to attend camp where he will be out in the open 24 hours a day, participating with other scouts of his own age in a program of camping, nature study, games, campfires, swimming, hiking, boating and other activities which boys like to do. The new style camp hats, sun helmets, are being distributed this week to those who have already sent in their applications and will be available as future camp registrations are received. The usual Pahatsi pine tree emblem and the numerals '36 will be on this new hat, with splendid opportunities for scouts to put other designs of their own making in addition to the hat honors they earn while at camp.

This week the winter water system will be dismanteled and the summer one checked and put into operation. A new hot water boiler of greater capacity and a new oil burner will be installed at the same time the French range is rebuilt.

The ritual for the Tribe of Pahatsi has been revised in accord with the rebuilding of the Indian Council fires on Tribe Island. This camp organization is open to all honor rampers doing something outstanding for camp or someone in the camp. Membership is entirely in the hands of the campers who elect new members and advance old rembers to higher rank.

Mr. Bert Davidson, who is developing his mining property on Moores Flat above North Bloomfield, accompanied by his wife, spent a few days in Nevada City, this week. Mr. Davidson brought in several hundred dollars in gold dust and good sized nuggets from a channel on his property, several weeks ago.

Timeplan

Timeplan **installment financing meets your every loan requirement**

"Timeplan" is the copyrighted name which describes all of the various types of installment credit loans with which Bank of America meets the financial needs of the individual. Remember the name *"Timeplan"*—remember, too, that when you establish your credit at Bank of America by making a *Timeplan* loan for any purpose, you have established your credit *once and for all* for making additional *Timeplan* loans for other financial needs. *Timeplan* assures you of completely confidential service. Repayment terms are arranged to fit your income.

Real Estate Loans from 1 to 20 years

Under the National Housing Act you may borrow to buy or build a home, any amount from $1000 to $16,000 (up to 80% of appraised value of both lot and improvements, as determined by FHA appraisal). EXAMPLE: If appraised value of house and lot is $5,000, you may borrow up to $4,000. Monthly payments on a 15-year loan are approximately $42, including taxes, insurance, interest and repayment of principal.

Automobile Financing (new or used cars)

Bank of America *Timeplan* automobile financing brings you a low cost plan for the purchase of a new or used car (not over 3 years old). All arrangements are made with the Bank. You are assured of the lowest financing cost. The plan provides for insurance which protects you, arranged, if you wish, through your own insurance broker or agent.

Personal Loans $50 to $1000

The Bank of America personal loan plan is a convenient source of funds for the payment of taxes, insurance premiums, hospital, medical or dental bills, or for meeting any legitimate emergency. Any employed individual of good character may apply for *Timeplan* personal loan. The cost of a *Timeplan* personal loan is exactly $6 per year for each $100 borrowed. *You receive the full amount of the loan you require — there are no deductions.* Repayment may be made within one year in monthly installments.

Home Appliance Financing (Through authorized dealers)

This *Timeplan* financing is arranged for the convenience of the purchaser entirely through the store or dealer to finance the deferred balance on the purchase of refrigerators, ironers, washing machines and other designated appliances. These loans are completed in the store when the purchase is made and they give you all the advantages of bank credit with repayment arranged in convenient monthly sums.

Modernization Loans under F.H.A.

Timeplan modernization loans, under the provisions of F.H.A., enable the borrower to name the maturity of his loan from 1 to 5 years. *Timeplan* modernization loans cover the repair, alteration, and modernization of homes, apartments, stores and farm buildings. Rates are the lowest available. Repayment is arranged in monthly sums.

Timeplan establishes your credit for all purposes

RUBY GRAVEL AND QUARTZ MINE

The old Ruby mine which lies between Forest and Downieville, in Sierra county, is being extensively developed by C. L. Best of the Best Tractor company in the bay district. A newly purchased diamond drill is testing channel location and gold content. A 2,400 foot cross cut revealed two rich serpentine belts, one being two feet, and the other six feet in width. The tunnel is 5,-200 feet in and several hundred feet to go to determine if the channel is a continuation of the old Bald Mountain mine to the east. A 25 ton flotation pilot mill is treating ore from a rich ledge discovered in the old channel about two years ago. L. Hulsdonk is resident manager.

CLAIM HOLDERS ATTENTION!

It is imperative that by July first all claim holders either file proof of assessment work or declare desire to hold their property under provisions of the recently enacted moratorium (with certain exceptions) as voted by Congress a few weeks ago. If this is not done the ground is open to relocating (jumping) at 12:01 p. m. July 1, 1936.

Miss Ida Fradelizio and Frank Atkinson Wed in Reno

Miss Ida Fradelizio of Nevada City and Frank Atkinson of Grass Valley were married in Reno, Nevada, last Sunday. They were accompanied by Mr. and Mrs. D. Rondoni of Forest Hill. Mr. Barberi being a cousin of the bride.

Miss Fradelizio daughter of Mr. and Mrs. A. Fradelizio of Pine street has spent most of her life here, and is popular with the younger set. She graduated from the local schools, and attended St. Mary's Academy in Grass Valley completing a commercial course there.

Mr. Atkinson, a young man of sterling quality, is employed in a local mine. Mr. and Mrs. Atkinson are on a short honeymoon which will take them as far as Klamath Falls. Upon their return they will reside in a cosy apartment on Sacramento street.

Evangeline Chapter Celebrates 63d Birthday

Evangeline Chapter, No. 13, O. E. S. of Nevada City celebrated its 63rd birthday Tuesday evening in Masonic hall with forty present. A large cake baked and decorated with emblems and colors of the five star points by Mr. Louis Kopp, local baker, was artistic and beautiful. Mrs. Helen Berger, Associate Matron, presented the cake to the chapter.

After the business meeting a short program of excellent numbers was enjoyed. Mrs. C. E. Bosworth, sang a solo, Mrs. Maude Hayes, instrumental solo; and two monologues by Misses Jane Bennett and Rose Ponticelli.

Bridge, whist and mah jongg were played during the evening with prizes going to Mrs. C. E. Bosworth, first in bridge, Mrs. M. Hayes, second and Mrs. Thomas low; whist, Mrs. Antha Locklin, first and Miss Jean Gleason, second; Mrs. Joseph Wilhoite won first place in mah jongg.

Evangeline Chapter is to be hostess chapter to Worthy Grand Matron Mrs. Bertie Y. Todd, of San Louis Obispo on Friday, June 26 in the local Masonic hall. Aurora Chapter of Grass Valley will assist in entertaining the grand matron. Grand Chapter is to be held in Sacramento this fall during the month of October. Dainty refreshments were served at the close of the evening.

DREAMS OF ACCORDIONIST AND BARITONE COME TRUE

A young star of community opera, son of a city fireman, and an accordionist whose fingers learned to fly in keeping up with those of a talented older cousin, today are well on their way toward the realization of their fondest dreams.

Ernest Gloe

Frank Tavaglione, the community opera favorite whose home is in Riverside, and Ernest Gloe, the accordionist, who lives in San Francisco, have been declared winners in the first semi-finals recently concluded in the state-wide tournament conducted by the "California's Hour" radio program.

They are the two survivors, as chosen by votes of California listeners, from among eight semi-finalists, who previously had won preliminary contests which established them as the representative artists from their own communities.

Tavaglione and Gloe will now await the finals which will be held several months from now and in which the winners of the two more semi-final broadcasts will also be entered.

Both winners are twenty years old, and each has hopes of a musical career. Tavaglione is a favorite of his home community, having sung in various civic and school productions. Gloe began playing the accordion when he was twelve, in friendly rivalry with an older relative also an accordionist.

To arrive where they are now in the state-wide tournament, Tavaglione and Gloe have won through these successive steps:

First they had an audition, among scores of others in their own communities. From among all the applicants heard, each was selected as one of ten, to be heard in public audition. A committee of their fellow citizens chose six of the ten to appear on the Columbia-Don Lee program, which is broadcast every Monday evening from 9 to 10.

People all over the State, in voting their choices from among the six on the program, selected Tavaglione on the Riverside broadcast and Gloe on the San Francisco program, for which each of the two won $50 in cash and a return trip to Los Angeles for the semi-finals.

Frank Tavaglione

Then, for winning in the latter event, each was awarded $100 in cash, and receives a chance to make still a third trip to Los Angeles to compete for the grand prize of $500. Besides the $100, they received a week's engagement at the Cocoanut Grove at Los Angeles' Ambassador Hotel.

Thus the final winner, when the series is completed, will have made three trips to Los Angeles, with traveling and other expenses paid, and will have been awarded a total of $650 in cash besides.

Tavaglione sang the Credo from "Othello", and Gloe played "Flight of the Bumble Bee".

Featured stars of "California's Hour" are Jane Froman, singer, and Conrad Nagel, noted actor who is master of ceremonies.

CAMPTONVILLE STUDENTS MAKE PILGRIMAGE

CAMPTONVILLE, June 18.—The students of the Camptonville branch of the Marysville Union high school, accompanied by a few former scholars of the school made their annual pilgrimage Friday to the Cross on the Pendola Hill at a very fitting and enjoyable occasion.

Eleven years ago when Mrs. Kate Hope Livingston began teaching the local branch school, she inaugurated an annual pligrimage picnic, at which time, the school made a journey to the top of Pendola's Hill where they erected a large white wooden cross. At the base of the cross they buried a lead plate with the inscription, "I wish to be of service to the world." and the students names added to the plate each time. A short program was usually had, followed by a picnic lunch. Each year from that time, the school has made this pilgrimage.

It haas become a very memorable occasion, and gives inspiration to the young people in taking a day a yeaar to pledge their usefulness to their fellow men.

The following students and former students were included on this pilgrimage: Dorothy Hays, Katheryne Pauly, Livingston Cloman, Mary Hackley, Lola B. Cleveland, Lynwood Wallace, Elizabeth Wallace, Warren Pauly, Minot Riddell, Thelma Butz, George Rose, Anna Lang, and Mrs. Kate Hope Livingston.

"FORD MET OUR FOUR DEMANDS—"
—Says California Rancher

Vernalis, California

Farming El Solyo's 4,500 acres results in harvests coming throughout the year.

This demands several essentials with regard to automobile equipment:

FIRST: Dependability.
SECOND: Economy of operation.
THIRD: Extra power for soft ground.
FOURTH: Extra speed for the highways.

Our Ford V-8 equipment has met these requirements in every regard. We are particularly pleased with the minimum of repairs and service hours.

Roy McBike
General Manager
EL SOLYO RANCH

Now try this even greater 1936 Ford V-8 Truck ON YOUR JOB
